Downloading and Installing GlobalProtect on a Windows Computer

GlobalProtect is the VPN application that must be installed on you home-based device to connect to a campus-based computer.

1. Visit https://gpnet.citytech.cuny.edu to download and install GlobalProtect
2. Login using your City Tech AD credentials to gain access to the site
3. Click on "Download Windows 32/64 bits GlobalProtect" whichever is applicable
4. Save the file in your Download folder and double-click on the file to run it
5. Click Run to begin installing the software
6. When the setup wizard appears click Next to continue
7. Once the installation is complete click Close
8. Click on the Start button and search for GlobalProtect. Double-click GlobalProtect to open the application.
9. Enter (gpnet.citytech.cuny.edu) for the Portal
10. Enter your City Tech AD credentials
11. Click Connect and a certificate window will appear
12. Click Continue
13. Once you have successfully logged on the status will read Connected

 Note: Always remember to disconnect from GlobalProtect when you are done with your sessions.
