# NEW YORK CITY COLLEGE OF TECHNOLOGY <br> The City University of New York 

## DEPARTMENT: <br> COURSE: <br> TITLE: <br> DESCRIPTION: <br> TEXT: <br> CREDITS: <br> PREREQUISITES: <br> Mathematics <br> MAT 1375 <br> Precalculus <br> Topics include an in-depth study of functions such as polynomial functions, inverse functions, radical functions, rational functions, trigonometric functions, exponential and logarithmic functions; solving inequalities; elements of vectors and complex numbers; solving trigonometric equations and identities involving sum, double and half-angle formulas; and progressions. A scientific calculator is required. <br> Precalculus by Thomas Tradler and Holly Carley, Third Edition <br> 4 <br> MAT 1275 or MAT 1275 CO OR Meet the Math Placement for MAT 1375

Prepared by Prof. Thomas Tradler (Revised Fall 2023)
A. Testing guidelines

The following exams should be scheduled:

1. A one-hour exam at the end of the First Quarter
2. A one-session exam at the end of the Second Quarter
3. A one-hour exam at the end of the Third Quarter
4. A one-session Final Examination
B. A scientific calculator is required.

## Course-Based Learning Outcomes and Alignment with General Education Goals

Upon satisfactory completion of this course, the student will be able to:

| Course Learning Outcomes | General Education Learning <br> Outcomes | Required Core: Mathematical and Quantitative Reasoning |
| :---: | :---: | :---: |
| Be able to graph functions involving polynomial, rational, radical, exponential, or trigonometric functions. Understand the relationship between the formula of a function, the domain and range of a function, the graph of a function, and equations involving a function. | Be able to draw conclusions and related outcomes from formulas and graphs of functions. | Interpret and draw appropriate inferences from quantitative representations, such as formulas, graphs, or tables. |
| Be able to analytically and graphically solve equations involving polynomial, rational, exponential, or trigonometric functions. Be able to identify features of a function such as maxima, minima, or asymptotes to identify features of the original problem. | Be able to analyze a function and its behavior. | Use algebraic, numerical, graphical, or statistical methods to draw accurate conclusions and solve mathematical problems. |
| Be able to frame word problems in terms of mathematical equations and/or graphs. Be able to interpret the mathematical solutions in terms of the original language of the problem. | Be able to use existing knowledge or views to phrase an application in terms of a mathematical problem, and be aware of the influence of its context and underlying assumptions. Be able to convert and represent relevant information into various mathematical forms. | Represent quantitative problems expressed in natural language in a suitable mathematical format |
| Be able to write solutions of mathematical problems involving polynomial, rational, exponential, or trigonometric functions with full detailed explanations. Be able to represent a mathematical setup using technology. Be able to answer questions concerning mathematical problems involving polynomial, rational, exponential, or trigonometric expressions orally or in written form. | Be able to perform calculations involving functions, and apply this to analyze a mathematical setup, including drawing appropriate conclusions based on quantitative analysis of data. Be able to give explanations of your conclusions, including its evidence. | Effectively communicate quantitative analysis or solutions to mathematical problems in written or oral form. |
| Be able to find solutions of equations and be able to identify the behavior of a mathematical setup using graphs of functions. Be able to use technology to find and check expected features. Be able to recognize error in proposed solutions and explain in written or oral form the nature of such an error as well as be able to correct it. | Be able to evaluate the underlying assumptions of an argument. Be able to recognize the limitations and implications of a mathematical setup. | Evaluate solutions to problems for reasonableness using a variety of means, including informed estimation. |
| Be able to use a variety of mathematical representations of functions to express qualitative and quantitative features of a problem. | Be able to select an appropriate model of a given setup and interpret the information presented in mathematical form. | Apply mathematical methods to problems in other fields of study. |

## New York City College of Technology Policy on Academic Integrity

Students and all others who work with information, ideas, texts, images, music, inventions, and other intellectual property owe their audience and sources accuracy and honesty in using, crediting, and citing sources. As a community of intellectual and professional workers, the College recognizes its responsibility for providing instruction in information literacy and academic integrity, offering models of good practice, and responding vigilantly and appropriately to infractions of academic integrity. Accordingly, academic dishonesty is prohibited in The City University of New York and at New York City College of Technology and is punishable by penalties, including failing grades, suspension, and expulsion. The complete text of the College policy on Academic Integrity may be found in the catalog.

## MAT 1375-Precalculus

Textbook: "Precalculus" by Thomas Tradler and Holly Carley, Third Edition, available on www.lulu.com
PDF available from: https://openlab.citytech.cuny.edu/mat1375coursehub/resources/textbook/

| Class | Topic | Homework | WeBWorK Set <br> (Challenge Problems are optional.) |
| :---: | :---: | :---: | :---: |
| 1 | 1. Numbers and functions | $1.1,1.2,1.3,1.5,1.6,1.7$ | Interval Notation <br> Functions - Introduction to Functions |
| 2 | 2. Functions via formulas | $\begin{aligned} & 2.1 \text { (a)-(b), 2.2, } 2.4 \text { (b), (f)-(h), } \\ & 2.6 \text { (a), (c), (d), (f)-(h) } \end{aligned}$ | Functions - Difference Quotient <br> Functions - Function Notation |
| 3 | 3. Functions via graphs | 3.1 (a)-(c), 3.2(a)-(c), <br> 3.3 (a)-(g) and (m)-(t), 3.4, 3.5 | Functions - Linear Functions <br> Functions - Graphs |
| 4 | 4. Basic functions and transformations (4.2 Exploring Functions with Desmos is optional) | $\begin{aligned} & 4.1 \text { (a)-(b), } 4.2 \text { (a)-(c) and (e), } 4.8 \text {, } \\ & 4.9 \text { (a)-(f), } 4.10 \text { (a)-(d), } 4.12 \text { (a)-(e), } \\ & \text { (optional: } 4.3 \text { (a)-(d), } 4.4 \text { (c)) } \end{aligned}$ | Functions - Graphing Calculator <br> Functions - Translations <br> Functions - Symmetries |
| 5 | 5. Operations on functions | $\begin{aligned} & 5.1 \text { (a)-(c), } 5.2 \text { (a)-(b), } 5.3 \text { (a)-(d), } \\ & 5.4 \text { (a)-(c), } 5.5 \text { (a)-(b), 5.6, 5.7 } \end{aligned}$ | Functions - Operations |
| 6 | 6. The inverse of a function | $\begin{aligned} & 6.1 \text { (a)-(c), } 6.2 \text { (a)-(f) and (l)-(p), } \\ & 6.3 \text { (a)-(c), } 6.4 \text { (a)-(c), } 6.5 \text { (a) and (d) } \end{aligned}$ | Functions - Inverse Functions |
| 7 | 7. Dividing polynomials <br> (7.3 Synthetic Division is optional) | $7.1 \text { (a)-(c) and (j)-(k), 7.2, 7.3, } 7.4 \text { (a)-(d) }$ (optional: 7.5 (a)-(d)) | Polynomials - Division |
| 8 | 8. Graphing polynomials (8.3 Graphing Polynomials by Hand is optional) | $\begin{aligned} & \text { 8.1-8.4 all, } 8.5(\mathrm{a})-(\mathrm{c}), 8.7(\mathrm{~b}),(\mathrm{g}),(\mathrm{i}),(\mathrm{j}) \\ & \text { (optional: } 8.8 \text { ) } \end{aligned}$ | Polynomials - Graphs |
| 9 | First Examination |  |  |
| 10 | 9. Roots of polynomials (9.1 Rational Root Theorem is optional) | $\begin{aligned} & 9.3 \text { (a), (c), (d), (e), (g), } 9.4(\mathrm{a}),(\mathrm{b}),(\mathrm{e}), \\ & 9.5(\mathrm{a}),(\mathrm{b}),(\mathrm{d}), 9.6(\mathrm{a})-(\mathrm{c}) \text { and (f)-(i) } \\ & \text { (optional: } 9.1 \text { (a)-(c)) } \end{aligned}$ | Polynomials - Theory <br> (Polynomials - Rational Roots is optional) |
| 11 | 10. Rational functions <br> (10.2 Graphing Rational Functions by Hand is optional) | 10.1, 10.2, 10.3, 10.4 (a), (b) | Rational Functions - Domains Rational Functions - Asymptotes Rational Functions - Intercepts Rational Functions - Comprehensive |
| 12 | 11. Exploring discontinuities and asymptotes <br> (11.2 Limits is optional) | $\begin{aligned} & \text { 11.1, 11.2, } 11.3(\mathrm{a})-(\mathrm{d}), 11.4(\mathrm{a}) \\ & \text { (optional: } 11.5,11.6 \text { (a), (d)-(f)) } \end{aligned}$ | Rational Functions - Graphs <br> (Limits is optional) |
| 13 | 12. Solving inequalities | $\begin{aligned} & 12.1 \text { (a), (b), } 12.2 \text { (a)-(c), (h), } 12.4 \text { (a)-(c), } \\ & 12.5 \text { (a), (c)-(g) } \end{aligned}$ | Polynomials - Inequalities Rational Functions - Inequalities |

| Class | Topic | Homework | WeBWorK Set |
| :---: | :---: | :---: | :---: |
| 14 | 13. Exponential and logarithmic functions | $\begin{aligned} & \hline 13.1 \text { (a)-(f), } 13.2 \text { (a)-(e), 13.4, } 13.5 \text { (a)-(b), } \\ & 13.6 \text { (a)-(h) } \end{aligned}$ | Exponential Functions - Graphs <br> Logarithmic Functions - Graphs |
| 15 | 14. Properties of $\log$ and $\log$ equations | $\begin{aligned} & 14.1 \text { (a)-(e), } 14.2 \text { (a)-(f), } \\ & 14.3 \text { (a), (b), (e)-(h) } \end{aligned}$ | Logarithmic Functions - Properties <br> Logarithmic Functions - Equations |
| 16 | Midterm Examination |  |  |
| 17 | 15. Equations and applications of exp | $\begin{aligned} & 15.1 \text { (a)-(c) and (e), } 15.2 \text { (a)-(e) } \\ & 15.3 \text { (a)-(b), 15.5-15.10 all } \end{aligned}$ | Exponential Functions - Equations |
| 18 | 16. Compound interest and half-life | 16.2 (a)-(c), 16.3 (a)-(e), 16.4-16.10 all | Exponential Functions - Growth and Decay |
| 19 | 17. Trigonometric functions reviewed | $\begin{aligned} & 17.1 \text { (a)-(d), } 17.2 \text { (a)-(d) } \\ & 17.3 \text { (a)-(i) and (q)-(s) } \\ & 17.4 \text { (a)-(c), } 17.5 \text { (a), (b), and (d) } \end{aligned}$ | $\begin{aligned} & \text { Trigonometry - Unit Circle } \\ & \text { Trigonometry - Sum Difference and Half } \\ & \text { Angle Formulas } \end{aligned}$ |
| 20 | 18. Graphing trigonometric functions | 18.2, 18.3, 18.4 (a)-(d), 18.5 (c)-(j) | Trigonometry - Graphing Amplitude <br> Trigonometry - Graphing Period <br> Trigonometry - Graphing Phase Shift <br> Trigonometry - Graphing Comprehensive |
| 21 | 19. Inverse trigonometric functions | 19.1, 19.2 (a)-(j), 19.3 (a)-(c) and (g)-(i) | Trigonometry - Inverse Functions |
| 22 | 20. Solving trigonometric equations | $\begin{aligned} & 20.1 \text { (a)-(d), } 20.2 \text { (a)-(c), } 20.4 \text { (a)-(c), } \\ & 20.5 \text { (a)-(f) } \end{aligned}$ | Trigonometry - Equations |
| 23 | 21. Trigonometric identities (21.2 Further Identities Revisited is optional) | $\begin{aligned} & 21.1 \text { (a)-(b), } 21.2 \text { (a), } 21.3(\mathrm{c})-(\mathrm{g}), \\ & 21.4 \text { (a) and (e)-(f) } \\ & \text { (optional: } 21.5 \text { (a)-(b), 21.6 (b)-(c)) } \end{aligned}$ | Trigonometry - Identities |
| 24 | Third Examination |  |  |
| 25 | 22. Vectors in the plane | 22.1 (a) and (d), 22.2 (a)-(c) and (e)-(h), 22.3 (b)-(e) and (k)-(l), 22.4 (a)-(b) | Vectors - Magnitude and Direction <br> Vectors - Operations |
| 26 | 23. Complex numbers | $\begin{aligned} & 23.1 \text { (a)-(c), } 23.2 \text { (b)-(e), } 23.3 \text { (a)-(c), } \\ & 23.4 \text { (a)-(d), } 23.5 \text { (a), } 23.6 \text { (a)-(d), } \\ & 23.7 \text { (a)-(d) } \end{aligned}$ | $\begin{aligned} & \hline \text { Complex Numbers - Operations } \\ & \text { Complex Numbers - Magnitude } \\ & \text { and Direction } \\ & \text { Complex Numbers - Polar Form } \end{aligned}$ |
| 27 | 24. Sequences and series | $\begin{aligned} & 24.1 \text { (a)-(c), } 24.3 \text { (a)-(d), } 24.4 \text { (a)-(d), } \\ & 24.5 \text { (a)-(b), } 24.7 \text { (a)-(b) and (e)-(i) } \end{aligned}$ | $\begin{aligned} & \text { Sequences - Intro } \\ & \text { Series - Intro } \\ & \text { Sequences - Arithmetic } \\ & \text { Series - Finite Arithmetic } \end{aligned}$ |
| 28 | 25. The geometric series | $25.1 \text { (a)-(d), } 25.2 \text { (a)-(c), } 25.3 \text { (a) and (h) }$ $25.4 \text { (a) and (f)-(j), } 25.5 \text { (a) }$ | Sequences - Geometric <br> Series - Geometric |
| 29 | Review | Final Exam Review Problems | Final Exam Review |
| 30 | Final Exam |  |  |
