JBIS Guidelines for Authors

1. Manuscript Text

- a. Text for publication in **JBIS** must be in the English language.
- b. A License to Publish form (see pages 4-5) is required with the paper, signed by the corresponding author. This can be sent separately from the paper but is required before the paper will be published. It is the corresponding author's responsibility to ensure all other authors are in agreement with the submission and the terms of publication.
- c. Security and copyright clearance, where necessary, is the responsibility of the authors.
- d. **JBIS** requires papers to be submitted in an electronic form compatible with PC formats. We can handle Microsoft Word for Windows up to version Word 2010. A PDF version of the paper would also be helpful to aid formatting. Authors are asked not to use auto-formatting, footnotes, endnotes, headers, footers, and other advanced features and keep the manuscript as close to a pure text file as possible. The exception to this is that it is helpful if mathematical equations are formatted in an equation editor. Please note that any formatting you introduce will have to be removed by the Editorial team for our own formatting process, so using your own formatting does not assist the process.
- e. The manuscript's file name should include the first named author's surname.
- f. For preference we would ask author's to submit manuscripts via email to: jbis@bis-spaceflight.com However if this is not possible, manuscripts can also be submitted by post and sent to: JBIS, The British Interplanetary Society, 27/29 South Lambeth Road, London, SW8 1SZ.

2. Preparation of Manuscripts

- a. A concise title should be followed by the author's name (without designation or distinction), full contact address, affiliation, email address (if applicable), a short summary abstract (a single paragraph of not more than 200 words) and a number of relevant keywords (about five) suitable for search engines to find the paper. The typescript should continue with introduction, text, conclusions, acknowledgements, references and notes, tables, figures and figure captions. Decimal paragraphing is used. Information on previous or intended conference presentation should be provided. **JBIS** does not have strict rules regarding paper length but expects authors to be concise and succinct in the presentation of their arguments. Typically a paper would be 5000 to 6000 words but shorter (2-3 page) papers are also accepted called Technical Notes. Papers longer than this would only be accepted when the content demands it, such as a major subject review.
- b. Mathematical equations may be either handwritten or typed, but must be clear. Unusual letters or symbols should be clearly identifiable. The solidus should be used for fractions in the text and for displayed formulae. Parentheses and fractional superscripts should be used to indicate square roots. On first use, acronyms should be translated in full into English. **JBIS** uses the SI system of units; if Imperial units are given, SI equivalent values should be added. The use of an Equation Editor is strongly advised.
- c. References and notes (i.e. replacement for end notes) should be shown in the text in numerical sequence in square parentheses e.g. [3], with the full list at the end of the paper in the following styles:
 1. A. June and W.R. Camp, "Space Trajectories", *J. Aerospace Sci.*, **20**, pp.635-642, 1983. (Journal Paper - where 20 is the volume number and pp gives page numbers)
 2. N. Sisakyan and V. Yazdavdkiy (eds), "*First Group Flight into Outer Space*", Nauka Publishing House, Academy of Sciences, Moscow, 1964. (Book)
 3. D.F. Lawden, "Interplanetary Rocket Trajectories", in *Advance in Space Science*, **Vol. 1**, ed. F.I. Ordway III, Academic Press, New York, p.3, 1959. (Article in Book)
 4. D.M. Ashford, "The Aeroplane Approach to Launch Vehicle Design", *JBIS*, **37**, pp.163-71, 1984. (Paper in *JBIS*)

- d. Internet sources are not generally acceptable as scientific confirmatory evidence, and are often transitory in nature. Their use as reference material should be carefully evaluated in the context of the contention they are being used to support. If they are used include the date the site was accessed in the following style: (Last Accessed 12th April 2012).

3. Style

- a. Texts will be edited, if necessary to conform to our House Style or achieve the best possible presentation. Acceptance of MSS will be dependent on acceptance by the author of any modifications required by the Editorial considerations or Peer Review.
- b. Please help us to avoid unnecessary editing by conforming to our editorial style as below. If these are not followed the Editor may alter texts to conform to our House Style but may also reject the paper if it does not read as a professional piece of writing.
 - 1. Please refer to figures in the text as e.g. "Fig. 1" etc.
 - 2. Avoid "I" and "we" (first person) and "You" (second person). Text should be written in an impersonal third person style e.g. "it will be seen?" rather than "you will see?" and "it will be shown?" rather than "I will show?".
 - 3. Omit references to previous sections or text e.g. "I have already said..." or which summarise what is to follow e.g. "This section will consider... and then consider.... and will show...".
 - 4. Do not use commas with conjunctions such as "and" or "but" and do not begin sentences with such words.
 - 5. The use of footnotes is discouraged. Such material should be incorporated into the main text or given as a note within the reference section, if required.

4. Illustrations

- a. A figure number and caption must be provided for each illustration. "Top" must be indicated if this is not obvious. Each figure should be cited in numerical order in the text. Figure captions should be short and concise. Every figure used must be referred to in the text.
- b. Permission should be obtained and formal acknowledgement made for use of a copyright illustration or material from elsewhere.
- c. Photos: Original photos are preferred if possible or good quality copies. Photos should be clear, with good contrast and free from blemish. If this is not possible please scan them as black and white photos with a resolution of 350 dpi. Please submit them in JPG format.
- d. Line drawings: Original drawings are preferred. If this is not possible please scan them as black and white drawings with a resolution of 600 dpi they can be submitted in TIFF format. Photocopies are not usually of an acceptable quality.
- e. Illustration size: please ensure that all electronically submitted illustrations are a minimum width of 140 mm.
- f. Images embedded in electronic documents are acceptable on first submission for review purposes, however if the paper is accepted for publication each illustration will be required as a separate file.

5. Suggested Referees

- a. Authors are encouraged to provide the names and contact details (including email addresses) for two suitable referees for their paper, if the paper is a highly specialised subject. These potential referees should not belong to the same organisation as the authors, nor be involved in the work reported, or have any other issues that might affect their ability to objectively review the paper. The authors should not contact the potential referees to ask their permission, this will be done by the **JBIS** editor if he decides to use them. The response of the suggested referees if contacted will not influence the acceptance or rejection of the paper. The responsibility for finding referees and their selection is the editors and the author's suggestions may or may not be used. The Editor has the final decision on publication or rejection.
- b. Additionally authors may also identify any potential referees that for reasons that are unlikely to be known to the editor would mean their objectivity would be in question. Authors do not need to provide the reasons they are requesting a specific referee not be used unless requested by the Editor.

6. The Process

- a. On receipt of the Manuscript and the License to Publish form the author will be sent an acknowledgement and the Editor will determine whether the paper is suitable for **JBIS**. Reasons for rejection at this stage include papers that are not within the subject matter covered by **JBIS**, papers that do not meet the originality requirements for an academic paper and papers where the presentational standard is irredeemably poor.
- b. If the paper is judged suitable then arrangements will be made for the paper to be reviewed. In general, only

papers that are recommended for publication by the referee will be published, although on rare occasions the Editor may overrule this recommendation or decide that further reviewers are required before a decision can be made. Every effort is made to shorten editorial review procedures to enable authors to be notified as soon as possible regarding acceptance for publication. However, **JBIS** is run largely by volunteers, and authors are requested to be patient with the process.

- c. The referee report is then returned to the author. It is common for referees to request changes or to suggest improvements. In general the paper will only be accepted if the referee's comments are fully addressed. The final form of the paper should then be submitted and this will be used to prepare the proofs which will be sent to the corresponding author for approval before publication.
- d. Authors should restrict alterations at proof stage to errors in spelling, punctuation etc. As these are often overlooked, it is recommended that, wherever possible, a colleague be invited to read the proofs to provide a second check against misprints of this sort. Major modifications to the original script can be accepted only in special circumstances.
- e. Once the proofs are accepted by the author the paper will be published in the next suitable issue. As a guide, papers are normally published within six months of submission and we aim to always get publication within a year. However the review process is very variable and **JBIS** cannot make any guarantees as to the publication date.
- f. Authors will receive a complimentary copy of the issue containing their paper free of charge.

Upon receipt of your paper an acknowledgement and a reference number will be sent. This number must be used in all correspondence with the editorial office.

The British Interplanetary Society requires that authors submitting papers to this journal must be prepared to undertake:

- (1) that the paper has not been published elsewhere (which includes the World Wide Web but excepting conference preprints) and that the author or authors will not permit its submission or publication elsewhere before it is accepted or declined by *JBIS*, and
- (2) that, if the paper is accepted for publication, the Society shall thereupon become entitled to the first world-wide publication and translation rights therein and that the author or authors or the authorised agent of the copyright holder shall, when called upon to do so, transfer to the Society the said first world-wide publication copyright and translation rights.

At the discretion of the Society these conditions may be waived, and no reasonable request from an author or authors to reproduce their work elsewhere will be refused.

The License to Publish form should be signed by the corresponding author or by the authorised agent of the copyright holder and returned immediately to the editorial office at the address above. If the paper is not accepted for publication, the transfer will become null and void.

License to Publish

(Please make a duplicate of this form for your own records)

Reference:

Title:

To transfer copyright to the British Interplanetary Society, the form below should be signed by the copyright owner(s) and returned to the editorial office. For jointly authored papers the corresponding author should sign on behalf of all the Authors (it is the responsibility of the corresponding to ensure all authors consent to the provisions of this licence). Where copyright is not owned by the Author(s), e.g. where an article was written by an author in the course of his or her employment, the form should be signed by the copyright-holder's authorised agent. Nothing in this agreement shall restrict the right of the author(s) or, in the case of work written by an author in the course of his or her employment, the employer, to revise, adapt, prepare derivative works, present orally or otherwise make use of the contents of the article. No proprietary right is claimed by the British Interplanetary Society other than copyright in *JBIS (Journal of the British Interplanetary Society)*.

I,
 certify that (I/the company of which I am the authorised signatory*) own(s) the copyright in the above-mentioned paper (hereafter referred to as the Paper), which has not been published elsewhere (which includes the World Wide Web but excepting conference preprints) and is not under consideration for publication elsewhere and of which the copyright has not previously been assigned.

If the Paper is accepted for publication in *JBIS*, I

- (i) confirm I have full right, power and authority to enter into this Agreement on behalf of (all of the Authors/the company of which I am the authorised signatory*).
- (ii) confirm that the Authors are the sole authors and if the Paper includes materials of others, the Authors have obtained the permission of the owners of the copyright in all such materials to enable them to grant the rights contained herein.
- (iii) confirm nothing in the Paper infringes any duty of confidentiality which any of the Authors may owe to anyone else or violates any contract, express or implied, of any of the Authors, and all of the institutions in which work recorded in the paper was carried out have authorised publication of the Paper.
- (iv) assign to the British Interplanetary Society first world-wide publication rights in any form (including the World Wide Web but excepting conference preprints) and in any language, (noting that subsequent to publication in *JBIS* all copyrights revert to the author(s)),
- (v) agree that the British Interplanetary Society may seek payment of fees from corporate bodies or individuals for the privilege of making copies of the article from the conventional printed form or from the article stored electronically, e.g. in the *JBIS* archive, and
- (vi) agree to indemnify the British Interplanetary Society in respect of claims made against it by third parties for copyright infringement related to publication of the article, or concerning the authorship of the article or rights to publish the article.

This work was done in my (our) capacity as an officer or employee of the US government. This transfer applies only to the extent allowable by law*
