## Understanding Gateway & Pathways Common Core

Some courses meet Pathways Common Core requirements, which are general education courses required for all students regardless of major. These are divided into Required Common Core and Flexible Common Core. The Required Common Core includes foundational courses in English Composition, Mathematical and Quantitative Reasoning, and Life and Physical Sciences. The Flexible Common Core requires students (especially in bachelor's, AA, and AS programs) to complete courses across areas such as World Cultures, U.S. Experience, Creative Expression, Individual and Society, and the Scientific World. Once a requirement is completed at one CUNY college, it transfers and fulfills the same requirement at another CUNY institution.

Some courses also meet Gateway requirements, which are designed for several of CUNY's most popular majors. These courses help students stay on track by allowing credits to transfer seamlessly toward their intended major at different CUNY colleges. Students who anticipate pursuing one of these majors can take the designated courses and will be able to transfer them for major credit seamlessly between CUNY colleges that offer the major
