## Placement: Self Study Guide and Review for MAT 1475

|  |  | Textbook | WeBWorK |
| :---: | :---: | :---: | :---: |
| Topic to review | Sample question for self test | Review the topics and practice from the textbook: <br> http://websupport1.citytech.cuny.edu /faculty/ttradler/Precalculus-TradlerCarley.pdf | For further sample question for self test and practice, go to: <br> https://mathww.citytech.cuny.edu/w ebwork2/Guest Access - MAT1375/ Click on: "Guest Login" |
| Functions (domain and range) | (a) Find the domain and range of the function $f(x)=\|x\|-4$ | Read chapter 3 and 5: <br> Practice exercise (p. 45): 3.6 <br> Practice exercises (p. 73-74): 5.1, 5.2 | WeBWork Set: <br> "Functions - Notation" |
| Functions (evaluation) | (b) Evaluate and simplify the difference quotient $\frac{f(x+h)-f(x)}{h}$ for $f(x)=x^{2}-5 x$ | Read chapter 3: <br> Practice exercises (p. 44-45): 3.1, 3.4, 3.5 | WeBWorK Set: <br> "Functions - Difference Quotient" |
| Functions (composition) | (c) Find the composition $(f \circ g)(x)$ for the functions $f(x)=x^{2}+3 x$ and $g(x)=2 x+7$ | Read chapter 6.1: <br> Practice exercises (p. 84): 6.4, 6.5 | WeBWorK Set: <br> "Functions - Operations" |
| Functions (inverse function) | (d) Find the inverse of the function $f(x)=\frac{2}{x+3}$ | Read chapter 7: <br> Practice exercise (p. 95-96): 7.2 | WeBWorK Set: <br> "Functions - Inverse Functions" |

| Topic to review | Sample question for self test | Textbook | WeBWorK |
| :---: | :---: | :---: | :---: |
|  |  | Review the topics and practice from the textbook: <br> http://websupport1.citytech.cuny.edu /faculty/ttradler/Precalculus-TradlerCarley.pdf | For further sample question for self test and practice, go to: <br> https://mathww.citytech.cuny.edu/w <br> ebwork2/Guest Access - MAT1375/ <br> Click on: "Guest Login" |
| Polynomial functions | (e) Find the roots of $f(x)=2 x^{3}-5 x^{2}+2 x$ | Read chapters 9.1 and 9.2: <br> Practice exercise (p. 129): 9.5 <br> Practice exercise (p. 144): 10.3 | WeBWorK Sets: <br> "Polynomials - Graphs" <br> "Polynomials - Theory" |
| Rational functions | (f) Graph the rational function, and identify its asymptotes, $x$-intercept(s), and $y$-intercept: $y=\frac{x-1}{x^{2}-4}$ | Read chapter 11.1: <br> Practice exercises (p. 168): 11.1-11.4 | WeBWorK Sets: <br> "Rational Functions - Domains" <br> "Rational Functions - Intercepts" <br> "Rational Functions - Asymptotes" |
|  | (g) Solve the inequality: $\quad \frac{x-3}{x+5} \geq 0$ | Read chapter 12: <br> Practice exercise (p. 180): 12.4 | WeBWorK Set: <br> "Rational Functions - Inequalities" |

| Topic to review | Sample question for self test | Textbook | WeBWorK |
| :---: | :---: | :---: | :---: |
|  |  | Review the topics and practice from the textbook: <br> http://websupport1.citytech.cuny.edu/ faculty/ttradler/Precalculus-TradlerCarley.pdf | For further sample question for self test and practice, go to: <br> https://mathww.citytech.cuny.edu/web work2/Guest Access - MAT1375/ <br> Click on: "Guest Login" |
| Exponential and logarithmic functions | (h) Graph the function: $f(x)=3^{-x}$ | Read chapter 13: <br> Practice exercises (p. 197-198): 13.2 | WeBWorK Set: <br> "Exponential Functions - Graphs" |
|  | (i) Graph the function: $f(x)=\ln (x-4)$ | Read chapter 13: <br> Practice exercises (p. 198): 13.6 | WeBWorK Set: <br> "Logarithmic Functions - Graphs" |
| Solving exponential equations | (j) Solve for $x$ : $3 e^{x-2}=5$ | Read chapter 14: <br> Practice exercise (p. 207): 14.5 | WeBWorK Set: <br> "Exponential Functions - Equations" |

|  |  | Textbook | WeBWorK |
| :---: | :---: | :---: | :---: |
| Topic to review | Sample question for self test | Review the topics and practice from the textbook: <br> http://websupport1.citytech.cuny.edu/ faculty/ttradler/Precalculus-TradlerCarley.pdf | For further sample question for self test and practice, go to: <br> https://mathww.citytech.cuny.edu/web work2/Guest Access - MAT1375/ Click on: "Guest Login" |
| Trigonometric functions | (k) State the amplitude, period and phase shift of the following function: $f(x)=5 \cdot \sin (2 x-\pi)$ <br> Graph the function. | Read chapter 17: <br> Practice exercise (p. 251): 17.6 | WeBWorK Sets: <br> "Trigonometry - Graphing Amplitude" <br> "Trigonometry - Graphing Period" <br> "Trigonometry - Graphing Phase Shift" <br> "Trigonometry - Graphing Comprehensive" |
| Solving sin, cos, tan equations | (l) Find all of the solutions between 0 and $2 \pi$ of the following equation $2 \cdot \cos ^{2}(x)+\sqrt{3} \cdot \cos (x)=0$ | Read chapter 20: <br> Practice exercise (p. 283): 20.4 | WeBWorK Set: <br> "Trigonometry - Equations" |

(a) domain $D=\mathbb{R}$, range $R=[-4, \infty)$, (b) $2 x-5+h$, (c) $(f \circ g)(x)=4 x^{2}+34 x+70$, (d) $f(x)=\frac{2}{x}-3$, (e) $x=0, x=2, x=\frac{1}{2^{\prime}}$
(f) vertical asymptotes: $x=2, x=-2$, horizontal asymptote: $y=0, x$-intercept: $x=1, y$-intercept: $y=\frac{1}{4}$, (g) solution set $S=(-\infty,-5) \cup[3, \infty)$, (j) $x=2+\ln \left(\frac{5}{3}\right)$, (k) amplitude $A=5$, period $P=\pi$, phase shift $S=\frac{\pi}{2}$, (l) $x=\frac{\pi}{2}, x=\frac{3 \pi}{2}, x=\frac{5 \pi}{6}, x=\frac{7 \pi}{6}$
