

**New York City College of Technology (CUNY)
RN-BS Program
Student Achievement Outcomes**

1. Students' completion of the nursing program

Estimated Level of Achievement: The expected level of achievement is that 60% of students will complete the RN-BS program within 3 years (150% program length) after registering for the first nursing class.

Program Completion		
Expected Level of Achievement	Year	Program Completion Rates
60% of students will complete within 3 years	2016 Cohort entered 2013	73%
60% of students will complete within 3 years	2015 Cohort entered 2012	73%
60% of students will complete within 3 years	2014 Cohort entered 2011	71%
60% of students will complete within 3 years	2013 Cohort entered 2010	50%

2. Graduates reporting obtaining a job

Expected Level of Achievement: The expected level of achievement is that 70% of graduates responding to the survey will report being employed as a registered nurse in the program satisfaction survey*.

Expected Levels of Achievement	Year	Job Placement Rate
70% of graduates responding to the survey will report being employed as a registered nurse in the program satisfaction survey.	2016	87.5%
70% of graduates responding to the survey will report being employed as a registered nurse in the program satisfaction survey.	2015	83%
70% of graduates responding to the survey will report being employed as a registered nurse in the program satisfaction survey.	2014	87 %
70% of graduates responding to the survey will report being employed as a registered nurse in the program satisfaction survey.	2013	91 %

* Based on respondents to graduate survey 6 months – one year after graduation.
